# SAFETY INFORMATION

## Federal Communications Commission (FCC) Notice (U.S. Only)

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Use only an RF shielded cable that was supplied with the display when connecting this display to a computer device.

To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or excessive moisture.

THIS CLASS A DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE CAUSING EQUIPMENT REGULATIONS.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**CE**

**WARNING:** This equipment is compliant with Class A of EN55032/CISPR 32. In a residential environment this equipment may cause radio interference.

## Polish Center for Testing and Certification Notice

The equipment should draw power from a socket with an attached protection circuit (a three-prong socket). All equipment that works together (computer, display, printer, and so on) should have the same power supply source.

The phasing conductor of the room's electrical installation should have a reserve short-circuit protection device in the form of a fuse with a nominal value no larger than 16 amperes (A).

To completely switch off the equipment, the power supply cable must be removed from the power supply socket, which should be located near the equipment and easily accessible.

A protection mark "B" confirms that the equipment is in compliance with the protection usage requirements of standards PN-93/T-42107 and PN-89/E-06251.

# SAFETY INFORMATION

## ***Wymagania Polskiego Centrum Badań i Certyfikacji***

Urządzenie powinno być zasilane z gniazda z przyłączonym obwodem ochronnym (gniazdo z kolkiem). Współpracujące ze sobą urządzenia (komputer, monitor, drukarka) powinny być zasilane z tego samego źródła.

Instalacja elektryczna pomieszczenia powinna zawierać w przewodzie fazowym rezerwową ochronę przed zwarciami, w postaci bezpiecznika o wartości znamionowej nie większej niż 16A (amperów).

W celu całkowitego wyłączenia urządzenia z sieci zasilania, należy wyjąć wtyczkę kabla zasilającego z gniazda, które powinno znajdować się w pobliżu urządzenia i być łatwo dostępne.

Znak bezpieczeństwa "B" potwierdza zgodność urządzenia z wymaganiami bezpieczeństwa użytkownika zawartymi w PN-93/T-42107 i PN-89/E-06251.

## ***Pozostałe instrukcje bezpieczeństwa***

- Nie należy używać wtyczek adapterowych lub usuwać kolka obwodu ochronnego z wtyczki. Jeżeli konieczne jest użycie przedłużacza to należy użyć przedłużacza 3-żyłowego z prawidłowo połączonym przewodem ochronnym.
- System komputerowy należy zabezpieczyć przed nagłymi, chwilowymi wzrostami lub spadkami napięcia, używając eliminatora przepięć, urządzenia dopasowującego lub bezzakłóceniewego źródła zasilania.
- Należy upewnić się, aby nic nie leżało na kablach systemu komputerowego, oraz aby kable nie były umieszczone w miejscu, gdzie można byłoby na nie nadeptywać lub potykać się o nie.
- Nie należy rozlewać napojów ani innych płynów na system komputerowy.
- Nie należy wpychać żadnych przedmiotów do otworów systemu komputerowego, gdyż może to spowodować pożar lub porażenie prądem, poprzez zwarcie elementów wewnętrznych.
- System komputerowy powinien znajdować się z dala od grzejników i źródeł ciepła. Ponadto, nie należy blokować otworów wentylacyjnych. Należy unikać kładzenia luźnych papierów pod komputer oraz umieszczania komputera w ciasnym miejscu bez możliwości cyrkulacji powietrza wokół niego.

## **Electric, Magnetic and Electromagnetic Fields ("EMF")**

- We manufacture and sell many products targeted at consumers, which, like any electronic apparatus, in general have the ability to emit and receive electromagnetic signals.
- One of our leading Business Principles is to take all necessary health and safety measures for our products, to comply with all applicable legal requirements and to stay well within the EMF standards applicable at the time of producing the products.
- We are committed to develop, produce and market products that cause no adverse health effects.
- We confirm that if its products are handled properly for their intended use, they are safe to use according to scientific evidence available today.
- We play an active role in the development of international EMF and safety standards, enabling us to anticipate further developments in standardization for early integration in its products.

# SAFETY INFORMATION

## Information for U.K. only

WARNING - THIS APPLIANCE MUST BE EARTHED.

Important:

This apparatus is supplied with an approved moulded 13A plug. To change a fuse in this type of plug proceed as follows:

- 1 Remove fuse cover and fuse.
- 2 Fit new fuse which should be a BS 1362 5A, A.S.T.A. or BSI approved type.
- 3 Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate 3-pin plug fitted in its place.

If the mains plug contains a fuse, this should have a value of 5A. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5A.

Note:

The severed plug must be destroyed to avoid a possible shock hazard should it be inserted into a 13A socket elsewhere.

# SAFETY INFORMATION

## How to connect a plug

The wires in the mains lead are coloured in accordance with the following code:

BLUE - "NEUTRAL" ("N")

BROWN - "LIVE" ("L")

GREEN & YELLOW - "EARTH" ("E")

- The GREEN & YELLOW wire must be connected to the terminal in the plug which is marked with the letter "E" or by the Earth symbol or coloured GREEN or GREEN & YELLOW.
- The BLUE wire must be connected to the terminal which is marked with the letter "N" or coloured BLACK.
- The BROWN wire must be connected to the terminal which marked with the letter "L" or coloured RED.

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the three wires.

# SAFETY INFORMATION

## End-of-Life Disposal

Your new Public Information Display contains materials that can be recycled and reused. Specialized companies can recycle your product to increase the amount of reusable materials and to minimize the amount to be disposed of.

Please find out about the local regulations on how to dispose of your old display from your local dealer.

### (For customers in Canada and U.S.A.)

This product may contain lead and/or mercury. Dispose of in accordance to local-state and federal regulations. For additional information on recycling contact [www.eia.org](http://www.eia.org) (Consumer Education Initiative).

## Waste Electrical and Electronic Equipment-WEEE

### Attention users in European Union private households

Disposal of Waste Equipment by Users in Private Household in the European Union.

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

For Private Households in the European Union. To help conserve natural resources and ensure the product is recycled in a manner that protects human health and the environment, we would like to bring your attention to the following:

- The crossed-out dustbin on the device or outer packaging indicates the product is compliant with European WEEE (Waste Electrical and Electronic Equipment) Directive
- Always dispose of the old devices separately from household waste
- Batteries should be removed beforehand and disposed separately to the right collection system
- You are responsible with regard to the deletion of personal data on old devices before disposal
- Private households can hand in their old devices free of charge
- For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product

# SAFETY INFORMATION

## Attention users in United States:

Please dispose of according to all Local, State and Federal Laws. For the disposal or recycling information, contact: [www.mygreenelectronics.com](http://www.mygreenelectronics.com) or [www.eiae.org](http://www.eiae.org).

## End of Life Directives-Recycling

Your new Public Information Display contains several materials that can be recycled for new users.

Please dispose of according to all Local, State, and Federal laws.

## Restriction on Hazardous Substances statement (India)

This product complies with the "India E-waste Rule 2011" and prohibits use of lead, mercury, hexavalent chromium, polybrominated biphenyls or polybrominated diphenyl ethers in concentrations exceeding 0.1 weight % and 0.01 weight % for cadmium, except for the exemptions set in Schedule 2 of the Rule.

## E-Waste Declaration for India

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

## Batteries

For EU: The crossed-out wheeled bin implies that used batteries should not be put to the general household waste! There is a separate collection system for used batteries, to allow proper treatment and recycling in accordance with legislation.

Please contact your local authority for details on the collection and recycling schemes.

For Switzerland: The used battery is to be returned to the selling point.

For other non-EU countries: Please contact your local authority for correct method of disposal of the used battery.

According to EU directive 2006/66/EC, the battery can't be disposed improperly. The battery shall be separated to collect by local service.

## Turkey RoHS

Türkiye Cumhuriyeti: EEE Yönetmeliğine Uygundur.

## Ukraine RoHS

Обладнання відповідає вимогам Технічного регламенту щодо обмеження використання деяких небезпечних речовин в електричному та електронному обладнанні, затвердженого постановою Кабінету Міністрів України від 3 грудня 2008 № 1057.

# PRECAUTIONS

**CAUTION**  
RISK OF ELECTRIC SHOCK  
DO NOT OPEN

## Symbols used in this manual

	This icon indicates the existence of a potential hazard that could result in personal injury or damage to the product.
	This icon indicates important operating and servicing information.

## Notice

- Read this User Manual carefully before using the LCD display and keep it for future reference.
- The product specifications and other information provided in this User Manual are for reference only. All information is subject to change without notice. Updated content can be downloaded from our web site at [www.agneovo.com](http://www.agneovo.com).
- To protect your rights as a consumer, do not remove any stickers from the LCD display. Doing so may affect the determination of the warranty period.

## Cautions When Setting Up

- Do not place the LCD display near heat sources, such as a heater, exhaust vent, or in direct sunlight.
- Do not cover or block the ventilation holes in the housing.
- Place the LCD display on a stable area. Do not place the LCD display where it may be subject to vibration or shock.
- Place the LCD display in a well-ventilated area.
- Do not place the LCD display outdoors.
- To avoid the risk of shock or permanent damage to the set, do not expose the display to dust, rain, water or an excessively moist environment.
- Do not spill liquid or insert sharp objects into the LCD display through the ventilation holes. Doing so may cause accidental fire, electric shock or damage the LCD display.

# PRECAUTIONS

## Cautions When Using

- Use only the power cord supplied with the LCD display.
- The power outlet should be installed near the LCD display and be easily accessible.
- If an extension cord is used with the LCD display, ensure that the total current consumption plugged into the power outlet does not exceed the ampere rating.
- Do not allow anything to rest on the power cord. Do not place the LCD display where the power cord may be stepped on.
- If the LCD display will not be used for an indefinite period of time, unplug the power cord from the power outlet.
- To disconnect the power cord, grasp and pull by the plug head. Do not tug on the cord; doing so may cause fire or electric shock.
- Do not unplug or touch the power cord with wet hands.
- When turning off the display by detaching the power cord, wait 6 seconds before re-attaching the power cord for normal operation.
- Do not knock or drop the display during operation or transportation.

## Cleaning and Maintenance

- To protect your display from possible damage, do not put excessive pressure on the LCD panel. When moving your display, grasp the frame to lift; do not lift the display by placing your hand or fingers on the LCD panel.
- Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use organic solvent, such as, alcohol, or ammonia-based liquids to clean your display.
- If your display becomes wet, wipe it with dry cloth as soon as possible.
- If a foreign substance or water gets in your display, turn the power off immediately and disconnect the power cord. Then remove the foreign substance or water, and send the unit to the maintenance center.
- In order to maintain the best performance of your display and ensure a longer lifetime, we strongly recommend using the display in a location that falls within the following temperature and humidity ranges.
  - ◆ Temperature: 0-40°C (32-104°F)
  - ◆ Humidity: 20-80% RH

### Warning:

Unplug the power cord from the power outlet and refer to qualified service

personnel under the following conditions:

- ◆ When the power cord is damaged.
- ◆ If the LCD display has been dropped or the housing has been damaged.
- ◆ If the LCD display emits smoke or a distinct odor.

# PRECAUTIONS

## Notice for the LCD Display

- In order to maintain the stable luminous performance, it is recommended to use low brightness setting.
- Due to the lifespan of the lamp, it is normal that the brightness quality of the LCD display may decrease with time.
- When static images are displayed for long periods of time, the image may cause an imprint on the LCD display. This is called image retention or burn-in.
  - ◆ To prevent image retention, do any of the following:
    - Set the LCD display to turn off after a few minutes of being idle.
    - Use a screen saver that has moving graphics or a blank white image.
    - Execute the ANTI-BURN-IN function of the LCD display. See **Configuration 1 > Panel Saving > ANTI-BURN-IN** section.
    - Switch desktop backgrounds regularly.
    - Adjust the LCD display to low brightness settings.
    - Turn off the LCD display when the system is not in use.
  - ◆ Things to do when the LCD display shows image retention:
    - Turn off the LCD display for extended periods of time. It can be several hours or several days.
    - Use a screen saver and run it for extended periods of time.
    - Use a black and white image and run it for extended periods of time.
- There are millions of micro transistors inside the LCD display. It is normal for a few transistors to be damaged and to produce spots. This is acceptable and is not considered a failure.
- **IMPORTANT:** Always activate a moving screen saver program when you leave your display unattended. Always activate a periodic screen refresh application if the unit will display unchanging static content. Uninterrupted display of still or static images over an extended period may cause “burn in”, also known as “after-imaging” or “ghost imaging”, on your screen. This is a well-known phenomenon in LCD panel technology. In most cases, the “burned in” or “after-imaging” or “ghost imaging” will disappear gradually over a period of time after the power has been switched off.
- **WARNING:** Severe “burn-in” or “after-image” or “ghost image” symptoms will not disappear and cannot be repaired. This is also not covered under the terms of your warranty.

# CHAPTER 1: PRODUCT DESCRIPTION

## 1.1 Unpacking

- This product is packed in a packaging box which contains standard accessories.
- Any other optional accessories will be packed separately.
- Considering the size and weight of the display, it is recommended that this product is carried out by two persons.
- After opening the packaging box, ensure that the included items are in good condition and complete.

## 1.2 Package Contents

When unpacking, check if the following items are included in the package. If any of them is missing or damaged, contact your dealer.

**LCD Display**

**Remote control**

**Quick Start Guide**

**HDMI cable**

**Power cord**

**RS232 cable**

### Note:

- ◆ Remote control is shipped with the supplied AAA batteries.
- ◆ For all other regions, apply a power cord that conforms to the AC voltage of the power socket and has been approved by and complies with the safety regulations of the particular country (Type H05W-F, 2G or 3G, 0.75 or 1 mm<sup>2</sup> should be used).
- ◆ You might like to save the package box and packing material for shipping the display.
- ◆ The pictures are for reference only. Actual items may vary upon shipment.

# PRODUCT DESCRIPTION

## 1.3 Preparing for the Installation

- Due to the high power consumption, always use the plug exclusively designed for this product. If an extended line is required, please consult your service agent.
- The product should be installed on a flat surface to avoid tipping. The distance between the back of the product and the wall should be maintained for proper ventilation. Avoid installing the product in the kitchen, bathroom or any other places with high humidity so as not to shorten the service life of the electronic components.
- The product can normally operate only under 3000m in altitude. In installations at altitudes above 3000m, some abnormalities may be experienced.

## 1.4 Wall Mounting Installation

To mount this display to a wall, you will have to obtain a standard wall-mounting kit (commercially available). We recommend using a mounting interface that complies with TUV-GS and/or UL1678 standard in North America.

To wall-mount the LCD display, screw the mounting bracket to the VESA holes at the rear of the LCD display.

### QM-65

### QM-75

### Warning:

- ◆ Do not press too hard on the LCD panel or edge of the frame, as this may cause the device to malfunction.

### Note:

- ◆ Avoid the wall-mounting kit to block the ventilation holes on the back of the display.
- ◆ Secure the LCD display on a solid wall strong enough to bear its weight.
- ◆ Lay a protective sheet on a table, which was wrapped around the display when it was packaged, beneath the screen surface so as not to scratch the screen face.
- ◆ Ensure you have all accessories for mounting this display (wall mount, ceiling mount, etc).
- ◆ Follow the instructions that come with the base mounting kit. Failure to follow correct mounting procedures could result in damage to the equipment or injury to the user or installer. Product warranty does not cover damage caused by improper installation.

# PRODUCT DESCRIPTION

## QM-86

### 1.4.1 VESA Grid

Model Name	VESA Grid
QM-65	400(W) x 400(H) mm
QM-75	600(W) x 400(H) mm
QM-86	600(W) x 400(H) mm

#### Caution:

To prevent the display from falling:

- ◆ For wall or ceiling installation, we recommend installing the display with metal brackets which are commercially available. For detailed installation instructions, see the guide received with the respective bracket.
- ◆ To lessen the probability of injury and damage resulting from fall of the display in case of earthquake or other natural disaster, be sure to consult the bracket manufacturer for installation location.

#### Note:

- ◆ For QM-65 wall-mounting kits, use M6 mounting screws (having a length 10 mm longer than the thickness of the mounting bracket) and tighten them securely.
- ◆ For QM-75 / QM-86 wall-mounting kits, use M8 mounting screws (having a length 15 mm longer than the thickness of the mounting bracket) and tighten them securely.
- ◆ Unit without base weight is 24.8 kg (QM-65), 53.3 kg (QM-75), or 63.8 kg (QM-86). The equipment and its associated mounting means still remain secure during the test. For use only with UL Listed Wall Mount Bracket with minimum weight/load is 32.8 kg (QM-65), 67.0 kg (QM-75), or 79.6 kg (QM-86).

# PRODUCT DESCRIPTION

## 1.4.2 Ventilation Requirements for Enclosure Locating

To allow heat to disperse, leave space between surrounding objects as shown in the diagram below.

## 1.5 Using the Remote Sensor and Power Status Indicator

- If you want to obtain a better reception of remote control function, please adjust the indicator location to easily check the power status indicator.
- If you want to mount the display to the wall, please push the indicator switch upwards before installation.
- When adjusting the indicator location, make sure to push/pull the indicator switch firmly until it clicks into place.

Push downward to reveal the indicator

Pull upward to hide the indicator

## 1.7.2 ID Remote Control

You can set the remote control ID when you want to use this remote control on one of several different displays.

To set the remote control ID:

- 1 Press the **ID** button. The red LED blinks twice.
- 2 Press the **ID SET** button for more than 1 second to enter the ID mode. The red LED lights up. Press the **ID SET** button again will exit the ID mode. The red LED lights off.
- 3 Press the digit numbers [0] ~ [9] to select the display you want to control. For example:
  - Display ID #1: press [0], [1]
  - Display ID #11: press [1], [1]The numbers available are from [01] ~ [255].
  - Not pressing any button within 10 seconds will exit the ID mode.
  - If an error pressing of buttons other than the digits occurred, wait 1 second after the red LED lights off and then lights up again, then press the correct digits again.
- 4 Press the **ENTER** button to confirm. The red LED blinks twice and then lights off.

### Note:

- ◆ Press the **NORMAL** button. The green LED blinks twice, indicating the remote control returns to normal operation.
- ◆ It is necessary to set up the ID number for each display before selecting its ID number.

# PRODUCT DESCRIPTION

## 1.7.3 Remote Control buttons on USB source

### 1 [POWER] POWER

Turn the display on or to put the display into standby mode.

The button is only controlled by Scalar.

### 2 [PLAY] PLAY

- Control playback of media (video/photo/music) files.

To play a media file, select **USB** >

**Compose** > edit or new add playlist >

choose media files > press the OK button to play all the media files in the playlist.

- When playing a video, press the ■ button to stop playing. Press the ► button, to replay the video from the beginning.
- When playing a video or displaying a slideshow, press the || button to pause playing.

- All media files should be put at the folder, which is named “agn” with sub-folder, under the root directory of the specified storage (internal/USB/SD Card). All sub-folders (video/photo/music) are named by media types and shouldn't be changed.

**videos:** {root dir of storage}/agn/video/

**photos:** {root dir of storage}/agn/photo/

**music:** {root dir of storage}/agn/music/

Note that the root directories of three storages are:

**Internal storage:** /sdcard

**USB storage:** /mnt/usb\_storage

**SD card:** /mnt/external\_sd

### 3 [SOURCE] SOURCE

Choose **USB** as the input source.

The button is only controlled by Scalar.

### 4 [HOME] HOME

Access the OSD menu.

The button is only controlled by Scalar.

### 5 [LIST] LIST

Move the focus up to the next control or widget such as buttons.

### 6 [NAVIGATION] NAVIGATION buttons

Navigate through menus and choose items.

# PRODUCT DESCRIPTION

## 7 [OK] OK

Confirm an entry or selection.

## 8 [↓] ADJUST

Move the focus down to the next control or widget such as buttons.

## 9 [MUTE] MUTE

Turn the mute function on/off.

The button is only controlled by Scalar.

## 10 [RED] [GREEN] [YELLOW] [BLUE] COLOR

No function. These two buttons are only controlled by Scalar.

## 11 [Number/ ID SET/ ENTER]

**ID SET/ENTER:** No function. These two buttons are only controlled by Scalar.

## 12 [ASPECT] FORMAT

Change the aspect ratio.

The button is only controlled by Scalar.

## 13 [←] BACK

Return to the previous menu or exit from the previous function.

## 14 [i] INFO

- Display information about current input signal. It is shown by Scalar.
- **USB > Compose > edit or new add playlist > choose any media files > press the [i] button to show the information of the chosen media file.**

## 15 [TOOLBAR] OPTIONS

Open toolbar.

- **USB > Compose > edit or new add playlist > press the [TOOLBAR] button to open toolbar. Toolbar opens on the left side of the screen.**

## 16 [−] [+] VOLUME

Adjust the volume level. The buttons are only controlled by Scalar.

# PRODUCT DESCRIPTION

## 1.7.4 Inserting the Batteries in the Remote Control

The remote control is powered by two 1.5V AAA batteries.

To install or replace batteries:

- 1 Press and then slide the cover to open it.
- 2 Align the batteries according to the (+) and (-) indications inside the battery compartment.
- 3 Replace the cover.

## 1.7.5 Handling the Remote Control

- Do not subject to strong shock.
- Do not allow water or other liquid to splash the remote control. If the remote control gets wet, wipe it dry immediately.
- Avoid exposure to heat and steam.
- Other than to install the batteries, do not open the remote control.

## 1.7.6 Operating Range of the Remote Control

Point the top of the remote control toward the display's remote control sensor (on the left or right side) when pressing a button.

When using the remote control, the distance from the remote control to the sensor on the display should be less than 5m/16ft, and the horizontal and vertical angles should be less than 30°.

**QM-65/QM-75**

### Caution:

The incorrect use of batteries can result in leaks or bursting. Be sure to follow these instructions:

- ◆ Place "AAA" batteries matching the (+) and (-) signs on each battery to the (+) and (-) signs of the battery compartment.
- ◆ Do not mix battery types.
- ◆ Do not combine new batteries with used ones. It causes shorter life or leakage of batteries.
- ◆ Remove the dead batteries immediately to prevent them from liquid leaking in the battery compartment. Don't touch exposed battery acid, as it can damage your skin.

### Note:

- ◆ If you do not intend to use the remote control for a long period, remove the batteries.
- ◆ The remote control may not function properly when the remote control sensor on this display is under direct sunlight or strong illumination, or when there is an obstacle in the path of signal transmission.

QM-75

# MAKING CONNECTIONS

QM-86

 **Caution:**

- ◆ Make sure that the LCD display is not connected to the power outlet before making any connections. Connecting cables while the power is ON may cause electric shock or personal injury.
- ◆ When unplugging the power cord, hold the power cord by the plug head. Never pull by the cord.

# MAKING CONNECTIONS

## 2.2 Connecting a Computer

### 2.2.1 Using VGA Input

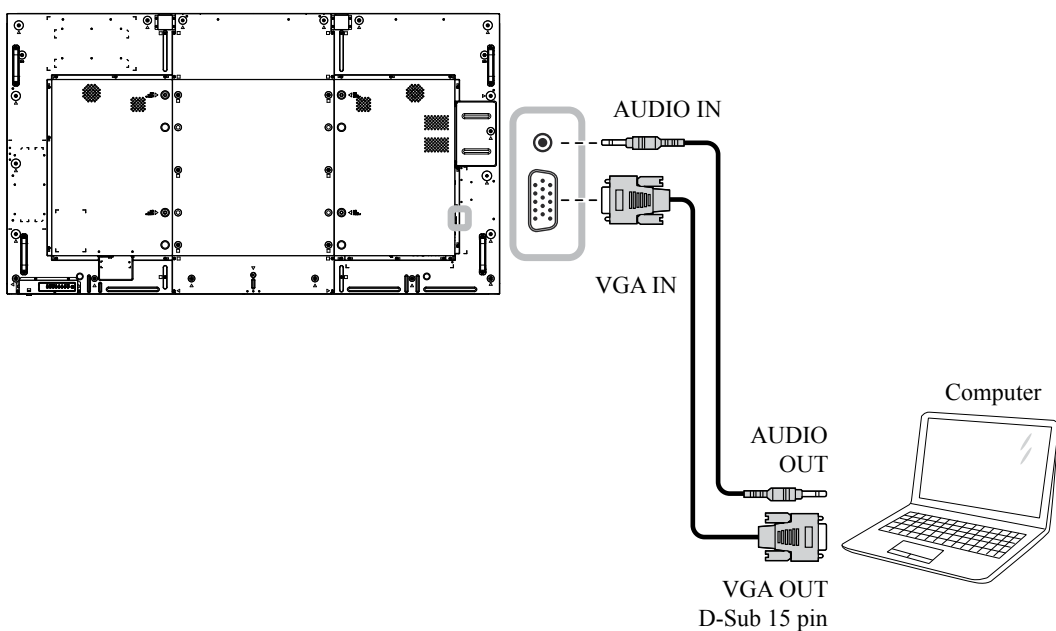

Connect one end of a D-sub cable to the VGA IN connector of the LCD display and the other end of a D-sub cable to the VGA OUT (D-Sub) connector of the computer.

For audio input, connect one end of an audio cable to the AUDIO IN connector of the LCD display and the other end of an audio cable to the AUDIO OUT connector of the computer.

## 2.6 Connecting Multiple Displays in a Daisy-chain Configuration

You can interconnect multiple displays to create a daisy-chain configuration for applications such as a video wall.

**⚡ Caution:**

To avoid unnecessary strain on the bezel, it is highly recommended to keep a minimum space of 0.5mm in which a business card is able to slip between all displays on all sides.

### 2.6.1 Display Control Connection

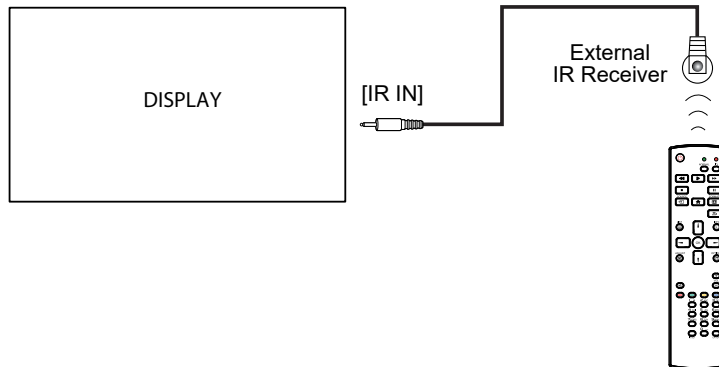

Connect the RS232 OUT connector of DISPLAY 1 to the RS232 IN connector of DISPLAY 2.

# MAKING CONNECTIONS

## 2.7 IR Connection

Connect the IR sensor cable to the IR IN connector of the LCD display.

### Note:

- ◆ This display's remote control sensor will stop working if the [IR IN] is connected.
- ◆ IR loop through connection can support up to 9 displays.
- ◆ IR in daisy chain via RS232 connection can support up to 9 displays.

## 2.8 IR Pass-Through Connection

Connect one end of an IR extender cable to the IR OUT connector of the LCD display and the other end of an IR extender cable to the IR IN connector of the video player.

# CHAPTER 3: USING THE LCD DISPLAY

## 3.1 Turning on the Power

1 Plug the power cord to a power outlet or power supply.

2 Press the  button to turn the LCD display on.

When the LCD display is turned on, press the  button to turn off the LCD display.

### Note:

- ◆ The LCD display still consumes power as long as the power cord is connected to the power outlet. Disconnect the power cord to completely cut off power.

### 3.1.1 Initial Setup

After you turn on the LCD display, a Welcome screen opens. You are prompted to select the default OSD language, configure network settings, and more. Follow the on-screen instructions to complete the initial setup.

# USING THE LCD DISPLAY

## 3.2 Selecting the Input Source Signal

- 1 Press the button.
- 2 Press the or button to choose a device, then press the OK button.

### Note:

- ◆ After pressing the button, a menu with available input sources will be displayed on the screen.

- ◆ If the selected input source signal is not connected to the LCD display or is turned off, the screen will display multi-color screen.

## 3.3 Adjusting the Volume

Press the or button to adjust the volume.

### Note:

- ◆ After pressing the or button, the volume icon is displayed on the screen automatically.

- ◆ Press the button to mute the audio.

# USING THE LCD DISPLAY

## 3.4 Changing the Picture Format

Press the  button repeatedly to change the picture format.

### Note:

The available picture formats include:

- ◆ **Full:** Restores the correct proportions of pictures transmitted in 16:9 using the full screen display.
- ◆ **4:3:** The picture is reproduced in 4:3 format and a black band is displayed on either side of the picture.
- ◆ **Real:** This mode displays the image pixel-by-pixel on screen without scaling the original image size.
- ◆ **21:9:** The picture is reproduced in 21:9 format and a black band at the top and bottom.
- ◆ **Custom:** Choose to apply the custom zoom settings set in the **Screen > Custom zoom** submenu.

# CHAPTER 4: USB SOURCE

## 4.1 Accessing the USB Menu

### Note:

- ◆ The control buttons described in this section are on the remote control.
- ◆ Press the  button once in any menu to return to the previous menu or repeatedly to return to the Hint screen as illustrated below.

To access the USB source, do the following:

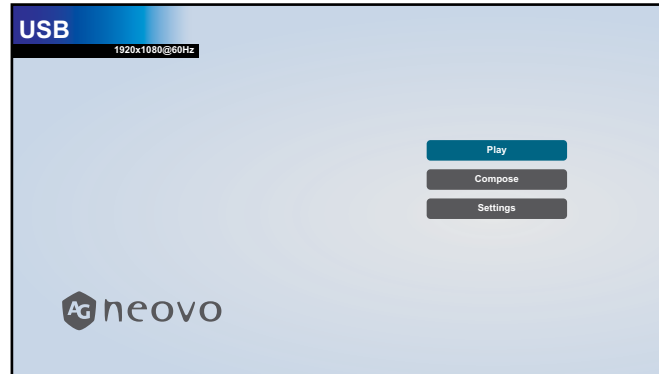

- 1 Press the  button to open a list of input sources.
- 2 Press the  or  button to select **USB** source from the list.
- 3 Press the **OK** button on the remote control to open the item.

# USB SOURCE

## 4.2 Using the USB Menu

Use the USB source to play your favorite photo, video, and music files. The files can be grouped into playlists from various storage devices, such as internal storage, USB storage, and SD card. The total number of playlists can be up to seven but the media content of a single playlist is not limited.

### 4.2.1 Creating a Playlist

All media files should be put at the folder, which is named “agn” with sub-folder, under the root directory of the specified storage. All sub-folders (video/photo/music) are named by media types and shouldn't be changed.

To create a playlist, do the following:

- 1 Copy your photo, video, and/or music files on the storage device to the following paths respectfully:
  - Photo: {root dir of storage}/agn/photo/
  - Video: {root dir of storage}/agn/video/
  - Music: {root dir of storage}/agn/music/

#### Note:

- ◆ Music files can be selected and used as background music for a slideshow.
- 2 Connect the storage device to the LCD monitor (if necessary).
- 3 Set the input source to **USB**. See “4.1 Accessing the USB Menu”.
- 4 Press the **↓** or **↑** button to select the **Compose** tab and then press the **OK** button to open the PlayList menu.

# USB SOURCE

- 5 Press the **▲** or **▼** button to select a file among **File 1** to **File 7** where you want to add your media files and then press the **OK** button.
- 6 Press the **←** or **→** button to select a storage device where are saved your media files and then press the **OK** button.

## Note:

- ◆ Press the **OK** button again if prompted to confirm the path.

A file browser opens where your media files on the storage device are displayed in the Source column and the content of the playlist is displayed in the Playlist column.

- 7 Press the **▲** or **▼** button to select the **Photo** or **Video** folder and then press the **OK** button. The folder content is displayed in the Source column.

- 8 Press the **▲** or **▼** button to select a media file for reviewing (if necessary). Press any of the following buttons:
  - **OK Select**: To select a single file. Press the **OK** button again to deselect the file.
  - **i Info**: To preview the media file.
- 9 Press the **Option**  button to start adding or modifying the playlist.

Then press the **▲** or **▼** button and press the **OK** button to select any of the following actions:

- **Select all**: Select all the visible media files on the storage device.
- **Delete all**: Delete all the media files in the playlist.
- **Add/Remove**: Add or remove the selected files from the playlist.
- **Sort**: Sort the media files in the playlist one by one. The Sort menu opens.

## USB SOURCE

- a) Press the ▲ or ▼ button and then press the OK button to select the file. Next to the selected file appears  icon.
  - b) Press the ▲ or ▼ button to adjust the file order in the Slideshow.
  - **Save/Abort:** Save the playlist or discard the modifications. Press the ◀ or ▶ button to select **Save** or **Abort** and then press the OK button to confirm. If you have added only photos to the playlist, you are prompted to add background music to the slideshow. Press the ▲ or ▼ button to select **Yes** or **No** and press the OK button to confirm. If you decide to add background music to the slideshow, you are prompted to select a music file from the Music folder.
  - **Back:** Close the toolbar.
- 10** Repeat steps 1 to 9 for creating more playlists.

# USB SOURCE

## 4.2.2 Modifying a Playlist

To modify a playlist, do the following:

- 1 Set the input source to **USB**. Refer to “4.1 Accessing the USB Menu”.
- 2 Press the **▲** or **▼** button to select the **Compose** tab and then press the **OK** button to open the PlayList menu.
- 3 Press the **▲** or **▼** button to select the playlist that you want to modify and then press the **OK** button.

### Note:

- ◆ You can modify only playlists that have the  icon next to the **File #**, where “#” is the file number.

Those playlists that do not have the  icon are empty.

- 4 Press the **←** or **→** button to select **Edit** or **Delete** the playlist and then press the **OK** button to confirm.
- 5 Perform any of the modifications as described in steps 7 to 9 in “4.2.1 Creating a Playlist” section.

## 4.2.3 Playing Files in a Playlist

To play files in a playlist, do the following:

- 1 Set the input source to **USB**. See “4.1 Accessing the USB Menu”.
- 2 Press the **▲** or **▼** button to select the **Play** tab and then press the **OK** button to open the PlayList menu.
- 3 Press the **▲** or **▼** button to select the playlist that you want to play and then press the **OK** button.

### Note:

- ◆ You can play only playlists that have the  icon next to the **File #**, where “#” is the file number.

Those playlists that do not have the  icon are empty.

## 4.2.4 USB Menu Settings

To configure USB menu settings, do the following:

- 1 Set the input source to **USB**. See “4.1 Accessing the USB Menu”.
- 2 Press the **▲** or **▼** button to select the **Settings** tab and then press the **OK** button to open the Settings menu.

# USB SOURCE

- 3 Press the **▲** or **▼** button to select any of the menu items and then press the **OK** button to enter its configuration menu:
- **Repeat Mode:** Press the **▲** or **▼** button to set the playlist repeat mode to **Repeat once** or **Repeat all** and then press the **OK** button to save the setting.
  - **Slideshow Effect:** Press the **▲** or **▼** button to set the slideshow effect to **Random**, **Bounce**, **Fade in/out**, **Top to bottom**, **Zoom**, **Left to right**, **Right to left**, **Fold**, **Corner**, or **None** and then press the **OK** button to save the setting.

- **Effect Duration:** Press the **▲** or **▼** button to set the slideshow effect duration to **5s**, **10s**, **15s**, or **20s** and then press the **OK** button to save the setting.

# CHAPTER 5: ON SCREEN DISPLAY MENU

## 5.1 Using the OSD Menu

#	Menu Navigation	Operation	
		Control Panel	Remote Control
1	Display the main menu screen. 	Press the <b>MENU</b> button.	Press the <b>Home</b> button.
2	Enter the submenu.  <p>The highlighted item (blue) indicates the active submenu.</p>	<ol style="list-style-type: none"> <li>1 Press the <b>▲</b> or <b>▼</b> button to select the menu item.</li> <li>2 Press the <b>+</b> button to enter the submenu.</li> </ol>	<ol style="list-style-type: none"> <li>1 Press the <b>↓</b> or <b>↑</b> button to select the menu item.</li> <li>2 Press the <b>OK</b> or <b>→</b> button to enter the submenu.</li> </ol>
3	Adjust the settings. For example: 	<ol style="list-style-type: none"> <li>1 Press the <b>▲</b> or <b>▼</b> button to select the submenu item.</li> <li>2 Press the <b>+</b> button to open the submenu item.</li> <li>3 Press the <b>▲</b> or <b>▼</b> button to adjust the value of the menu item.</li> </ol>	<ol style="list-style-type: none"> <li>1 Press the <b>↓</b> or <b>↑</b> button to select the submenu item.</li> <li>2 Press the <b>OK</b> button to open the submenu item.</li> <li>3 Press the <b>←</b> or <b>→</b> button to adjust the value of the menu item.</li> </ol>
4	Exit the submenu.	Press the <b>MENU</b> or <b>←</b> button to return to the previous menu.	Press the <b>OK</b> or <b>↶</b> button to return to the previous menu.

# ON SCREEN DISPLAY MENU

#	Menu Navigation	Operation	
		Control Panel	Remote Control
5	Close the OSD window.	Press the <b>MENU</b> button or <b>—</b> button several times.	Press the <b>⬆</b> button or the <b>↶</b> button several times.

When settings are modified, all changes are saved when the user does the following:

- Proceeds to the another menu.
- Exits the OSD menu.
- Waits for the OSD menu to disappear.

## Note:

- ◆ Availability of some menu items depend on the input source signal. If the menu is not available, it is disabled and grayed out.

# APPENDIX

Image Decode				
Type	Image Codec	Container	Decode	Remark
JPEG	JFIF file format 1.02	File Format: JPG, JPEG	V	Max Resolution: 7000 x 7000 The limitation of max resolution depends on DRAM
BMP	BMP	File Format: BMP	V	Max Resolution: 15360 x 8640 The limitation of max resolution depends on DRAM
PNG	PNG	File Format: PNG	V	Max Resolution: 15360 x 8640 The limitation of max resolution depends on DRAM

## Note:

- ◆ Sound or video may not work if the contents have a standard bit rate/frame rate above the compatible Frame/sec listed in the table above.
- ◆ Video content with a Bit rate or Frame rate larger than the rate specified in the table above can cause choppy video during playback.

## 7.3 Input Mode

### VGA Resolution

Standard Resolution	Active Resolution		Refresh Rate	Pixel Rate	Aspect Ratio	Stand for Mode
	Horizontal Pixels	Vertical Lines				
VGA	640	480	60 Hz	25.175 MHz	4:3	Video Graphic Array
			72 Hz	31.5 MHz		
			75 Hz	31.5 MHz		
WVGA	720	400	70 Hz	33.75 MHz	16:9	Wide Video Graphic Array
SVGA	800	600	60 Hz	40 MHz	4:3	Super VGA
			75 Hz	49.5 MHz		
XGA	1024	768	60 Hz	65 MHz	4:3	Extended Graphic Array
			75 Hz	78.75 MHz		
WXGA	1280	768	60 Hz	79.5 MHz	5:3	Wide XGA

SXGA	1280	1024	60 Hz	108 MHz	5:4	Super XGA
WXGA	1360	768	60 Hz	85.5 MHz	16:9	Wide XGA
UXGA <sup>1</sup>	1600	1200	60 Hz	162 MHz	4:3	Ultra XGA
HD1080	1920	1080	60 Hz	148.5 MHz	16:9	HD1080

## Note:

- ◆ 1280x768@60Hz can be supported but not shown in EDID table.
- ◆ 1: Not supported in QM-65 model.

# APPENDIX

## SD Resolution

Standard Resolution	Active Resolution		Refresh Rate	Pixel Rate	Aspect Ratio
	Horizontal Pixels	Vertical Lines			
480i	720	480	29.97 Hz	13.5 MHz	4:3
480p			59.94 Hz	27 MHz	
576i	720	576	25 Hz	13.5 MHz	4:3
576p			50 Hz	27 MHz	

## HDTV Resolution

Standard Resolution	Active Resolution		Refresh Rate	Pixel Rate	Aspect Ratio
	Horizontal Pixels	Vertical Lines			
720p	1280	720	50 Hz	74.25 MHz	16:9
			60 Hz		
1080i	1920	1080	25 Hz	74.25 MHz	16:9
			30 Hz		
1080p	1920	1080	50 Hz	148.5 MHz	16:9
			60 Hz		
2160p (DP/OPS)	3840	2160	30 Hz	297 MHz	16:9
2160p (HDMI only)	3840	2160	30 Hz	297 MHz	
			50 Hz	594 MHz	
			60 Hz		

### General guidelines:

- The PC text quality is optimum in HD 1080 mode (1920 x 1080, 60Hz).
- Your PC display screen might appear different depending on the manufacturer (and your particular version of Windows).
- Check your PC instruction book for information about connecting your PC to a display.
- If a vertical and horizontal frequency-select mode exists, select 60Hz (vertical) and 31.5KHz (horizontal). In some cases, abnormal signals (such as stripes) might appear on the screen when the PC power is turned off (or if the PC is disconnected). If so, press the **SOURCE** button to enter the video mode. Also, make sure that the PC is connected.
- When horizontal synchronous signals seem irregular in RGB mode, check PC standby mode or cable connections.
- The display settings table complies to the IBM/VESA standards, and based on the analog input.
- The best timing for the vertical frequency to each mode is 60Hz.

# APPENDIX

## 7.4 Cleaning

### Caution When Using the Display

- Do not bring your hands, face or objects close to the ventilation holes of the display. The top of the display is usually very hot due to the high temperature of exhaust air being released through the ventilation holes. Burns or personal injuries may occur if any body parts are brought too close. Placing any object near the top of the display could also result in heat related damage to the object as well as the display itself.
- Be sure to disconnect all cables before moving the display. Moving the display with its cables attached may damage the cables and thus cause fire or electric shock.
- Disconnect the power plug from the wall outlet as a safety precaution before carrying out any type of cleaning or maintenance procedure.

### Front Panel Cleaning Instructions

- The front of the display has been specially treated. Wipe the surface gently using only a cleaning cloth or a soft, lint-free cloth.
- If the surface becomes dirty, soak a soft, lint-free cloth in a mild detergent solution. Wring the cloth to remove excess liquid. Wipe the surface of the display to remove dirt. Then use a dry cloth of the same type to dry.
- Do not scratch or hit the surface of the panel with fingers or hard objects of any kind.
- Do not use volatile substances such as insect sprays, solvents and thinners.

### Cabinet Cleaning Instructions

- If the cabinet becomes dirty, wipe the cabinet with a soft, dry cloth.
- If the cabinet is extremely dirty, soak a lint-free cloth in a mild detergent solution. Wring the cloth to remove as much moisture as possible. Wipe the cabinet. Use another dry cloth to wipe over until the surface is dry.
- Do not allow any water or detergent to come into contact with the surface of the display. If water or moisture gets inside the unit, operating problems, electrical and shock hazards may result.
- Do not scratch or hit the cabinet with fingers or hard objects of any kind.
- Do not use volatile substances such as insect sprays, solvents and thinners on the cabinet.
- Do not place anything made from rubber or PVC near the cabinet for any extended periods of time.

# APPENDIX

## 7.5 Troubleshooting

Symptom	Possible Cause	Remedy
No picture is displayed	<ul style="list-style-type: none"> <li>The power cord has been disconnected.</li> <li>The main power switch on the back of the display is not switched on.</li> <li>The selected input has no connection.</li> <li>The display is in standby mode.</li> </ul>	<ol style="list-style-type: none"> <li>1 Plug in the power cord.</li> <li>2 Make sure the power switch is switched on.</li> <li>3 Connect a signal connection to the display.</li> </ol>
Interference displayed on the display or audible noise is heard	Caused by surrounding electrical appliances or fluorescent lights.	Move the display to another location to see if the interference is reduced.
Colour is abnormal	The signal cable is not connected properly.	Make sure that the signal cable is attached firmly to the back of the display.
Picture is distorted with abnormal patterns	<ul style="list-style-type: none"> <li>The signal cable is not connected properly.</li> <li>The input signal is beyond the capabilities of the display.</li> </ul>	<ul style="list-style-type: none"> <li>Make sure that the signal cable is attached firmly.</li> <li>Check the video signal source to see if it is beyond the range of the display. Please verify its specifications with this display's specification section.</li> </ul>
Display image doesn't fill up the full size of the screen	The picture format is not set correctly.	Press the  button and select a suitable picture format.
Can hear sound, but no picture	Improperly connected source signal cable.	Make sure that both video inputs and sound inputs are correctly connected.
Can see picture but no sound is heard	<ul style="list-style-type: none"> <li>Improperly connected source signal cable.</li> <li>Volume is turned all the way down.</li> <li><b>MUTE</b> function is turned on.</li> <li>No external speaker connected.</li> </ul>	<ul style="list-style-type: none"> <li>Make sure that both video and sound inputs are correctly connected.</li> <li>Press the <b>+</b> or <b>-</b> button to hear the sound.</li> <li>Switch the <b>MUTE</b> function off by using the  button.</li> <li>Connect the external speakers and adjust the volume to a suitable level.</li> </ul>
Some picture elements do not light up	Some pixels of the display may not turn on.	This display is manufactured using an extremely high level of precision technology: however, sometimes some pixels of the display may not display. This is not a malfunction.
After-Images can still be seen on the display after the display is powered off. (Examples of still pictures include logos, video games, computer images, and images displayed in 4:3 normal mode)	A still picture is displayed for an over extended period of time.	Do not allow a still image to be displayed for an extended period of time as this can cause a permanent after-image to remain on the display.

# APPENDIX

## 7.6 Transporting the LCD Display

To transport the LCD display for repair or shipment, place the display in its original packaging carton.

### QM-65

- 1 Place the LCD display inside the supplied protective bag.
- 2 Place the lower foam cushion (a) inside the lower box.
- 3 Place the LCD display (b) down in the lower box.
- 4 Place the upper foam cushion (c) on top of the LCD display.
- 5 Place the accessories box on the designated area (if necessary).
- 6 Place the upper box on LCD display.
- 7 Secure the upper box to the lower box with the supplied locks (d).

# APPENDIX

## QM-75

- 1 Place the LCD display inside the supplied protective bag.
- 2 Place the lower foam cushion (a) inside the lower box.
- 3 Place the LCD display (b) down in the lower box.
- 4 Place the upper foam cushion (c) on top of the LCD display.
- 5 Place the accessories box on the designated area (if necessary).
- 6 Place the upper box on LCD display.
- 7 Secure the upper box to the lower box with the supplied locks (d).

# APPENDIX

## QM-86

- 1 Place the LCD display inside the supplied protective bag.
- 2 Place the lower foam cushions (a) inside the lower box.
- 3 Place the LCD display (b) down in the lower box. Then place the thin foam cushion in front of the screen.
- 4 Place the upper foam cushions (c) on top of the LCD display.
- 5 Place the accessories box on the designated area (if necessary).
- 6 Place the upper box on LCD display.
- 7 Secure the upper box to the lower box with the supplied locks (d).
